

I listen to K-LOVE, a national listener-supported radio station out of California that is heard in the Minneapolis area at 90.7 FM. There is a concern that K-LOVE could lose its translators here if an LPFM station is given priority over this signal. K-LOVE fills a gap in the Twin Cities music spectrum, targeting young (and young-at-heart) people with encouraging, positive music. Please act to ensure that this service is continued.
